

ATTACHMENT G

TACTICAL REPORTING TO THE STATE EOC

This protocol covers:

- 1) Limited-area events of any kind where direct tactical communication between a local net and the State EOC is possible.
- 2) SITREPs via short tactical messages directly to State EOC where speed is important. Weather and ground conditions, flooding, damage reports, communications status, etc.

This protocol does NOT cover slower wide-area formal message handling, which will use the standard net structure outlined in the Emergency Communications Plan. This protocol may be implemented in addition to or instead of the standard network structure as needed.

When KB1CFL (State EOC) is operational: KB1CFL will monitor the K1JY system, and will also scan from net to net asking for reports and messages. Also, email reports and messages can be sent to ares@hsem.nh.gov. Urgent messages may also be delivered by telephone to the **State EOC ARES desk at 223-3684**.

When KB1CFL (State EOC) is NOT operational: Preferred method is by email to john.wynne@hsem.nh.gov. Urgent messages may also be delivered to the **State EOC radio room duty operator at 223-3685** or **Chief of Communications John Wynne at 223-3611**. State EOC Team members with WebEOC access may act as net liaisons and input SITREPS and messages from home or other locations with stable Internet access, following established SEOC protocols.

EMAIL CAUTION: Verify that an email account is being monitored before sending it any messages.

Variations: The reporting methods above are subject to EOC staffing, and the availability of telephone and email. If possible, alternative email addresses, phone numbers, or methods will be sent via email, and by KB1CFL or others on the K1JY network. When direct links are not possible, the Section HF Net may be convened with a State EOC liaison station on VHF.

Reporting format: Reports should be short and to the point. For weather, follow the Skywarn guidelines for severe weather reporting. Do not send data that is not requested, unless it is related to an Emergency message, OR if the information indicates a significant change in the situation. The State EOC may also request specific information related to the event.

Contact Numbers:

State EOC ARES Desk: 223-3684

John Wynne, BEM Chief of Comms: 223-3611

NWS Gray: 1-877-633-6772 (public reporting number)

Email Addresses:

State EOC ARES Desk: ares@hsem.nh.gov

John Wynne: john.wynne@hsem.nh.gov
